Project No.  
 21016.1  
 Approved: EGL  
 Date: 10/29/12

Setback limits for all NWR RTP active fields, including those proposed for the re-application of biosolids. The area of proposed re-application fields after applying all setbacks is 354.4 acres.  
 Note 1: The external compliance boundary has been updated to reflect the current property ownership by CORPUD.  
 Note 2: National Wetlands Inventory database (<http://www.fws.gov/wetlands/Wetlands-Mapper.html>) was used for wetlands and for the wetland buffer other than the constructed wetlands.
